

# Products and Services

Our full range of products and services ensure you can count on Cabco to deliver high quality communications solutions that work for your business.

### Structured Cabling/Wiring

Our oldest, most widely known area of expertise is copper and fibre optic cabling for voice and data. From a single office to call centres with thousands of telephone and computer cables, Cabco's technicians are highly trained cabling experts that pride themselves on providing excellence. Our teams will travel to your site for MAC work, new construction and outdoor building-to-building cabling. No job is too small or too big.

### Business Telephone

Get the latest business telephone solutions from the industry's leading manufacturers like *Avaya, Polycom, Nortel* and others. From VoIP and Key Systems to automated attendants, we offer cost-effective solutions installed and serviced by our team of telecommunications experts.

### Unified Communications

Streamline your business communications and ensure information moves efficiently between devices. From LAN to WAN to Internet, we can help make all of your communications easier and more efficient.

### Technical Relocation

Moving? Trust Cabco to safely and professionally transport, unpack and re-deploy your fragile workstations, phones, and other sensitive network equipment.

### Networking

Our team of IT experts will assess your network and make recommendations based on your overall needs. Trust Cabco to implement the right solutions capable of handling all of your voice, multimedia and data requirements.

### Security/Risk Management

Protect your property from theft and liability with the latest surveillance and security systems. From door swipes and access controls, to video recorders and network-enabled cameras, Cabco has a full range of solutions to meet your needs.

### Conferencing

From a simple audio conferencing telephone to high definition video conferencing systems (such as *LifeSize Communications*), Cabco can design and install a conferencing solution that fits your business needs, venue and participation levels.

### Wireless

Flexible and scalable WiFi solutions to meet all your needs, including wireless access points, guest access, long distance point-to-point and business class wireless solutions.

### Digital Signage

Let our team of professionals handle the on-site installation and wiring of your digital signage placements.

### Consulting Services

Let the Cabco IT and telecommunications experts help you design and implement the right communications solutions for your business.

### CATV & Internet Installation

As a sub-contractor to Service Providers, we have vast experience installing telephone, television and internet services for both residential and commercial clients.

### Leasing

Make sure you're never stuck with outdated equipment. Take advantage of Cabco's flexible Leasing services to help you manage your capital and protect your investment.
